WORK EXPERIENCE

Full Stack Developer, Fickl Marketing

Jun 2022 - Present

Fickl is a comprehensive marketing platform committed to empowering businesses to manage their marketing content and strategies effortlessly. Tech stack React, Redux, Google Firebase, Tailwind CSS, Ant Design, and Stripe API.

- Developed and launched 20+ features from concept to production, including implementations of a daily email reminder system, intuitive drag-and-drop functionality for events within the calendar, and conversion of web content into PDF.
- Integrated third-party APIs to develop email marketing features and streamlined social media auto-publish function.
- Automated customer payments with Stripe and Firebase extension.
- Managed all aspects of the development including design, implementation, and deployment.

Teaching Assistant, BrainStation Web Development Bootcamp

Mar 2022 - Jun 2022

- Graded assignments and provided feedback on progress.
 - Conducted code review for 25 students.
 - Participated in weekly retros and stand-ups with the Education Team.
 - Promoted cross-collaboration for students in Web Development and UX Design.
-
